

# FRAZER PKD

GRINDING TOOLS MADE OF METAL  
FOR ALL COMMONLY USED GRINDING  
MACHINES

## APPLICATION FIELDS

- Industrial floors (made of concrete, screed, designer screed, terrazzo)
- Designed to remove all types of floor covering and epoxy resin coatings and to grind floors.

## BONDS | DRY

- PKD-diamond bond
- Suitable for dry grinding

## ADVANTAGES

- PKD tools offer high abrasion strength resulting in high efficiency grinding.
- Extremely resistant due to protected PKD segments.
- Minimal disposal costs since only layer to be removed is peeled off.
- Substrate remains undamaged resulting in flat surface ready to receive new coating/layer.
